

**FR PLACEMENT** *des abat-jour NAPATA*

L'installation du modèle *NAPATA* sera parfaitement exécutée si tous les abat-jour sont jointifs. Dès lors, il est conseillé de commencer par installer l'abat-jour **A** (Ø80), et ensuite dans l'ordre **B, C, D** jusqu'au **E** (Ø40). Veillez à ce que les coutures des abat-jour soient positionnées vers le centre.

Au centre de chaque abat-jour, un appareil *KENTIKA MINI* ou *KENTIKA FINE CEILING* doit être installé. Les abat-jour sont fixés contre le plafond au moyen des attaches fournies.

**NL PLAATSING** *van NAPATA lampenkappen*

De installatie van het model *NAPATA* zal perfect uitgevoerd zijn, wanneer al de lampenkappen tegen elkaar geplaatst worden. Daarom is het aangeraden om te beginnen met de lampenkap **A** (Ø80), en dan in volgorde **B, C, D** tot **E** (Ø40). Zorg ervoor dat de naden van de lampenkappen zich plaatsen in het midden.

In het centrum van elke lampenkap dient er een *KENTIKA MINI* of *KENTIKA FINE CEILING* geplaatst worden. De lampenkappen dienen "geplakt" te worden tegen het plafond. Om dit te doen, worden speciale bevestigingen meegeleverd voor elke lampenkap.

**EN MOUNTING** *of NAPATA lampshades*

The installation of the *NAPATA* will be perfectly fixed when the lampshades are placed against each other. It's recommended to start with the lampshade **A** (Ø80) and then in order **B, C, D** to **E** (Ø40). Make sure that the seam of the lampshade is positioned toward the center.

In the center of each lampshade, a fixture *KENTIKA MINI* or *KENTIKA FINE CEILING* will be attached. Each lampshade must be "pasted" to the ceiling. To do this, special clips are delivered with each lampshade

**DE PLATZIERUNG** *des Lampenschirmen NAPATA*

Die Platzierung der *NAPATA* wird perfekt behoben werden, wenn die Lampenschirmen gegeneinander gestellt werden. Es wird empfohlen, mit der Lampenschirm **A** (Ø80) ein zu fangen und dann in der Reihenfolge **B, C, D** ihrer bis **E** (Ø40). Stellen Sie sicher, dass die Nähte der Lampenschirm in Richtung der Mitte positioniert sind.

In der Mitte von jeder Lampenschirm ist ein *KENTIKA MINI* oder *KENTIKA FINE CEILING* installiert. Jeder Lampenschirm muss an der Decke "geklebt" werden. Hierzu werden spezielle Befestigungen mit jeder Lampenschirm geliefert.

**Manufacturer : DAVIDTS LIGHTING – Brussels – Belgium – [www.davidts.com](http://www.davidts.com)**

### **Installation and security instructions (please read and save)**

This luminaire is manufactured according to European directives and standards relating to quality and safety of lighting fixtures. A declaration of conformity is available by downloading on our site.

### **Description of the lighting**

Lighting for fixing to the wall or ceiling with handmade lampshade(s) with a soft and pleasant light distribution. More pictures, drawings and complete descriptions are available on our website.

### **Environmental protection**

Our packaging is made from 100% recyclable or re-usable material. For care of the environment please sort or recycle. Fluorescent bulbs and waste electrical equipment should not be disposed of with household waste please take to a recycling facility. This fixture is essentially composed of solid brass. This metal and other elements are fully recyclable. At end of life, if you take the fixture to a recycling facility, each metal will be recovered for new metal production.

### **Installation of the lighting**

This lighting is only intended for indoor use, it must be installed away from moisture, splashing and sources of heat. Suitable for direct mounting on normally flammable surfaces. Before starting the installation, ensure the electrical supply is OFF at the circuit breaker in the consumer unit. Only switching OFF at the wall switch is not adequate.

Carefully remove all packaging. All of our fixtures are fixed to the wall or to the ceiling by means of a mounting plate (placement is done by means of screws and dowels, not supplied). Some of our luminaires have more detailed installation instructions (attached to this document). Please read carefully before starting the installation.

If your light lighting has a fitting with lampshade ring, unscrew it in order to secure the lampshade to the fitting. If the lampshade is made with a seam, make sure that it is positioned towards the back of the light. Screw down the ring carefully. Place the bulb (not supplied) without forcing into the fitting. If necessary straighten the lampshade, only by carefully flexing the metal rods of the lampshade.

If you have any doubt about the installation of this lighting, please contact a qualified electrician.

### **Inserting or replacing a bulb**

Always ensure the electrical supply is OFF before this operation. If necessary, let the old bulb to cool for 10 minutes before removing. Place the bulb without forcing into the fitting. Do not directly touch it with the fingers, but with a cloth (fingerprints reduce the lifetime of a bulb). Be always attentive to the choice of a bulb, never exceed the maximum power (W) authorized, indicated on the labels of the light fitting. If an integral LED bulb attached to the fixture is defective, please contact your distributor.

### **Maintenance of your lampshades**

When your lampshade is dusted use only a brush suitable for delicate fabrics. Never rub the lampshade with a damp cloth or with water. Stains or marks on lampshades can't be removed, attempting removal will risk increasing the surface of the stain. In the case of a disaster, only a new lampshade can recover the original beautiful aspect and clarity of your lighting. To do this please contact your distributor.

### **Maintenance of your lighting**

Because smoke and dust particles in the air are attracted by a heat source, a deposit will appear on the fixture in the course of time. For maintenance, allow the bulb to cool for at least 10 minutes. Clean the fixture with a paper towel soaked with glass cleaner. Never use solvents, abrasive or corrosive products. Never immerse the fixture in water. If the wires are damaged, they must be replaced by a qualified electrician. This fixture must never be modified as this can make it dangerous to use.
